

Year 2

Weekly learning

Information about some of the things we will be learning in the week beginning 17th January 2022

RAINFOREST LAYERS

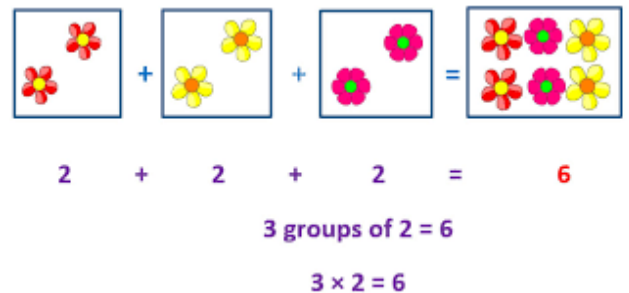

English

This week we will be learning about the different layers of the rainforest. We will find out about which animals live in these different layers and why. We will also be looking at woodland areas and will write descriptive sentences about what we can see. We will then think of woodland animals that we will use to innovate the story of "The Umbrella".

Maths:

This week in maths we will begin by looking at adding repeated, equal groups and then move on to understanding how this is the same as multiplication.

We will learn how to answer multiplication questions by using practical resources and drawings to help us.

RE:

This week children will be learning about the book of gospels. They will learn about who wrote them and what they tell us. Children will enjoy exploring these gospels and choosing their favourite stories to create a story board to retell them. We will then share the different stories we chose and what they tell us about.

PE: This week in PE we are continuing to develop our skills in maintaining balance when walking forwards and backwards on a line with fluidity. We will continue to practise keeping our balance whilst also lifting our knees up to make a 90 degree angle and lifting our heels up to our bottom. We will be playing games to practise these skills and challenging ourselves to not only keep our balance on the ground but also along a balancing beam.

Our PE days:

2S Friday and Tuesday

2J Friday and Tuesday

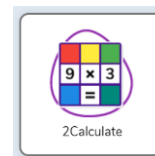

Please come to school in PE clothes instead of uniform on these days.

Music

This week we will continue to learn the rock song "I Wanna Play In A Band" by Joanna Mangona. We will be listening to the rock song "We Will Rock You" by Queen and will discuss the following questions:

- Do you like the song?
- What can you hear?
- What is the style of this music?
- How is the song put together?

ICT

This week we will continue learning about spreadsheets using the 2Calculate tool on purple mash. We will learn how to calculate totals using different functions. We will then use the data to answer questions.

Topic - Science

This week we will be exploring the uses of everyday materials by looking at different things in our environment. We will discuss why we think that particular material has been used, referring to the properties of that material. We will be gathering and recording data to help us answer questions.

P.S.H.E. (Personal, Social, Health Education)

This week we will be looking at how we keep ourselves safe at home. We will explore why we have rules and how we can keep ourselves physically emotionally safe including online safety, road safety, cycle safety and safety in the environment. We will learn that there are some household products can be harmful, including medicines.
